Altoona Outdoors is supplementing the City of Altoona's monetary and planning resources to complete a recreational trail system faster than could be done otherwise.

Most trails are planned to be off-street, in the "right-of-way" of City streets or County roads. The standard will be 10-foot asphalt trails for walking year round, and for biking in spring, summer and fall. Some trails will be on-street in areas with limited motor vehicle traffic.

2006: We have matching grants available from the Department of Natural Resources for three trails segments starting in 2006. These include:
- The entire length of Lake Road
- Two segments in the Otter Creek area, completing a west-side loop, and making the Otter Creek foot trails more accessible

2007: New grant applications are underway to complete the East-Side loop of the trail system into the Town of Washington.

A complete trail plan is available by contacting Altoona Outdoors, or the City of Altoona.
